

ISSUES OF WATER, HYGIENE, MALNUTRITION AND DISASTERS

Below is a map of Ghana, with a zoom on the Northern Region illustrating some of the past and on-going projects of the Red Cross in Ghana. In the coming two weeks, with the team of 25 selected local volunteers whom we have trained this past week, we will identify systematically the main issues related to **water and sanitation** in 52 Nestlé cocoa communities located in the Ashanti and Eastern Regions.
