

ISSUE OF OPEN DEFECATION

- 19 of November was the “[World Toilet Day](#)”.
- It was estimated in 2015 that 2.4 billion (about 1 out of 3 people) lack access to improved sanitation facilities, and just under 1 billion continue to defecate openly.
- Sanitation is a human right, just like the human right to water.
- Lack of access to sanitation, impacts on health, dignity, and safety.
- Ghana has one of the highest rate of open defecation in Africa.

Simple ways to avoid risk of disease from poor sanitation

Toilets, safe water, hygiene and hand-washing
